

Software Developer

Georef Systems Ltd.

Job Summary

We are seeking to enhance our development team with the addition of a talented and motivated professional to fulfill the role of Software Developer. We are looking for someone who not only has a solid grasp of software development using ASP.NET, MVC and C#, but who will also bring "something special" to our company. As a Software Developer, you will be uniquely positioned to improve and foster your technical skills by working directly with the members of the development team to build top-shelf route planning software and logistics applications for the K-12 education industry. This opportunity will allow you to join our company at an exciting time of expansion, challenging you to learn the software behind our business while also being given opportunities for continued learning and personal development. You will be an integral part of our development team using your technical skills to build solutions that will effectively and efficiently service the needs of our rapidly growing client base. We are looking for someone who is motivated to seize opportunities to work in an agile development environment on leading edge development projects and software prototypes requiring new research and integrating with the newest technologies. Your daily development will enhance our software offering and contribute directly to customer satisfaction.

Our employees enjoy competitive salaries with bonuses for performance, plus a full health benefits package. Join us and work as a close-knit team to make a difference for student transportation across North America.

Job Responsibilities

- Develop and maintain our code base using MS Visual Studio with your understanding of application design and SQL database solutions.
- Participate in architecture and design discussions and contribute new and fresh ideas for development.
- Actively participate in project design meetings within a structured agile environment and effectively communicate project status and challenges.
- Use your problem solving skills to find innovative solutions and work to incorporate those innovations into our software to maintain our edge in the industry.
- Provide technical assistance to our help-desk team when technical challenges are beyond their capabilities.

Required Skills

- A proficiency with ASP.NET, MVC, C#, in an MS Visual Studio environment
- A working knowledge of SQL and query design
- Skills in Android and iOS application development, using Xamarin would be an asset
- Time management skills and organizational skills that demonstrate attention to detail
- Good communication skills and a willingness to work within a collaborative team environment

Additional Information

We require a successful Criminal Records check

Compensation and Benefits

Georef offers a competitive salary with bonuses for performance, plus a comprehensive health benefits package. Our company also offers opportunities for growth within the multiple teams, development environments and management.
