relax

Every enterprise system comes with some administrative and IT requirements. The BusPlanner® *Suite* is no different, but there are other options! BusPlanner® *SaaS* is designed to offer you all the benefits of the BusPlanner® *Suite* without the need for IT staff to help you manage it. We do that for you!

BusPlanner® *SaaS* is exactly that. Software as a Service. Your solution can be customized to your needs, but instead of having to install and manage on your servers, we take care of all the IT and host it for you.

Benefits of BusPlanner® *SaaS*:

- All the planning power of BusPlanner®, none of the IT hassles!
- No hardware for you to purchase
- Access BusPlanner® anytime from anywhere
- Managed by our team of professionals

BusPlanner®

Why BusPlanner® *SaaS?* ›

With BusPlanner® *SaaS*, we build, host, and maintain your secure BusPlanner® environment. BusPlanner® *SaaS* enables you to:

- Save time and energy. No need to purchase, set up, maintain, or worry about the IT around your BusPlanner® environment.

- Access BusPlanner® from anywhere. Open BusPlanner® *Pro* from your desk, your living room, or anywhere with a reliable Internet connection.

- Get immediate support. Our Client Services team becomes your single source of support – Just call us and we can help!
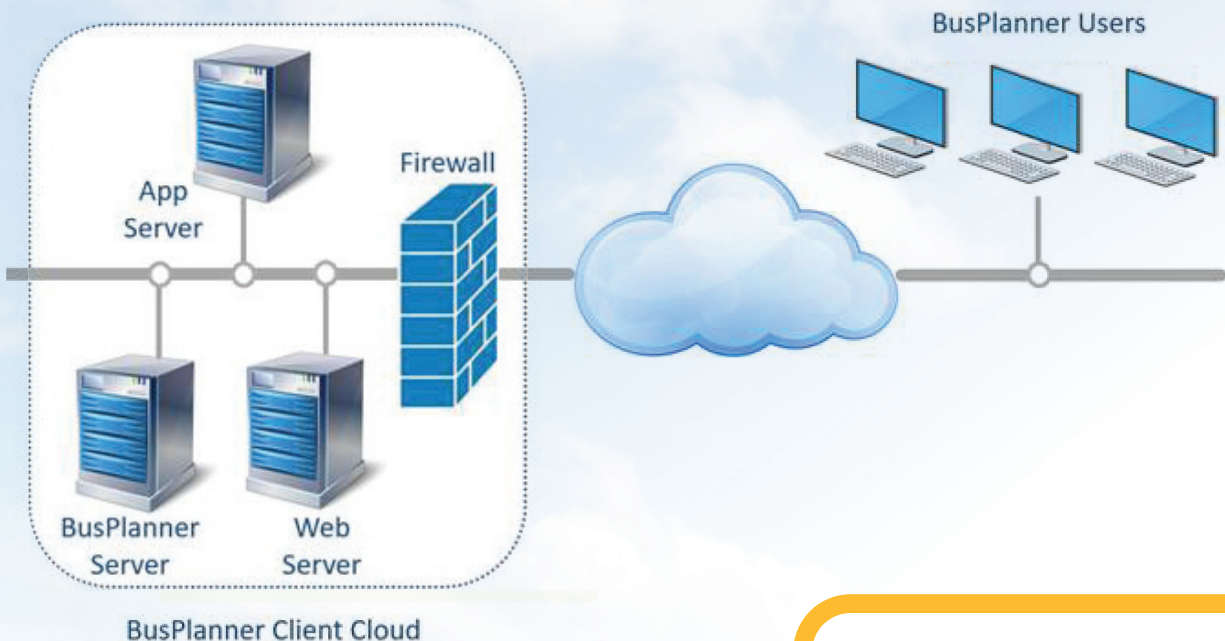

How Does It Work?

Your transportation databases will be housed within our secure environment in the cloud. Once your new environment is configured and ready to use, each user will access the cloud via a special remote application to connect to BusPlanner®.

Board staff and the public will access your web portal as if it was in your office. Your data is kept safe at all times and at no time will it be shared with any other organization.

Switching to BusPlanner® *SaaS* ›

For existing BusPlanner® clients, switching to BusPlanner® *SaaS* is simple. The remote access can be configured. Then, at a pre-arranged date and time, we will "flip the switch" and move your key databases to our environment. Downtime is minimal and you will be up and running on the new environment. It's that easy.
