BusPlanner VP

Is Virtual Planner Right For Me? ›

BusPlanner® *Virtual Planner* is ideal for schools or districts that operate between 5-15 buses. There is minimal cost for the initial implementation of your system; we charge by the number of buses you have. Since there is no need to purchase any software, BusPlanner® *Virtual Planner* is an ideal, low-risk solution at an affordable price!

Benefits ›

- Reduce stress by letting our professionals do the planning
- Reduce calls from parents and schools because they can get the information themselves
- Increase your service to parents via bus delay portal service

How Does It Work?

BusPlanner® *Virtual Planner* service is based on our renowned **BusPlanner® Student Transportation Management System**, employed by school boards and transportation providers across North America. Our team of experienced transportation planners will plan your routes and post the results on a **BusPlanner®** *Web* portal specifically customized for you. Parents, school administrators, and/or bus operators will all have up-to-date routing information available to them throughout the school year via this secure web portal. Email notifications for communicating bus delays and/or school cancellations are also included.
