## School Bus Tracker

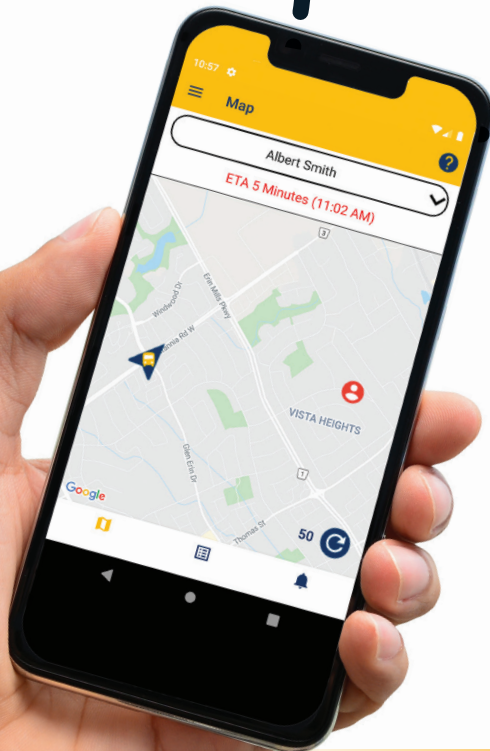

## School Bus Tracker App for Parents

**These days, parents expect real-time busing information. Chipmunk provides this and more.**

Chipmunk enables parents to see their child's bus location — in real time — along with the estimated time of arrival for their student.

Chipmunk delivers:

- Real-time travel data using AI technology
- An ETA feature for projected arrival times
- Support for all major GPS vendors
- Bus seat assignment for contact tracing
- Alerts and two-way messaging with parents

**Chipmunk. Now you know.**

# More Apps from BusPlanner®

## BusPlannerTurns

### Turn-By-Turn Directions for Drivers

BusPlanner® Turns delivers live, turn-by-turn directions for school bus drivers to follow while they drive their route. This real-time app offers:

- Clear visual and audible directions directly from your BusPlanner® routing system
- Dynamic re-routing to get off-route drivers back on track
- Downloadable instructions to minimize mobile data usage

## BusPlannerSubs

### GPS Bus & Driver Substitutions

BusPlanner® Subs enables bus drivers to select and verify their assigned vehicle each day so that your GPS information matches your routing information — before they hit the road. It's as easy as 1-2-3:

- Open the BusPlanner® Subs app
- Select the assigned route and vehicle number
- Start driving

## BusPlannerAssistant

### Busing Information On the Go

BusPlanner® Assistant provides on-demand access to your own bus routing data — right from your phone. Whether you're a manager, bus supervisor, or routing technician, you can:

- View specific runs, routes, vehicles, and students
- Confirm stop locations and times
- Identify who is assigned to each stop
